Sustainability Policy

Introduction

Aspco Limited commits to integrating sustainable practices across our diverse operations in architecture, software development, exhibition creation, manufacturing, and installation. Our policy reflects our dedication to environmental stewardship and social responsibility.

Policy Statement

We pledge to conduct all aspects of our business — from design to production to installation — in an environmentally responsible manner. This commitment extends to adopting sustainable practices in our architectural designs, software solutions, manufacturing processes, and exhibition setups.

Objectives

Sustainable Design and Development: Incorporate eco-friendly and energy-efficient practices in our architectural and software development projects.

Resource Efficiency in Manufacturing: Implement sustainable methods in the production of museum and exhibition cabinets and showcases, focusing on reducing waste and using recycled or eco-friendly materials.

Green Installation Practices: Ensure that our installation processes, both for equipment and showcases, adhere to environmental best practices.

Sustainable Procurement: Commit to purchasing sustainable materials and choosing suppliers with strong environmental credentials.

Client-Centric Sustainable Solutions: Offer clients sustainable options in exhibition design and interactive installations, emphasizing conservation and energy efficiency.

Employee Engagement: Foster a culture of sustainability among our employees and provide training on eco-friendly practices.

Management Systems

Our management system includes regular sustainability audits and adherence to environmental regulations and standards.

We set and review measurable sustainability targets, assessing our progress and making continual improvements.

Commitment to Innovation and Continuous Improvement

We commit to continuous innovation in sustainable practices, seeking new ways to reduce our environmental impact and improve the communities we serve.

Policy Review

This policy is reviewed annually, ensuring it remains aligned with our evolving sustainability goals and the latest environmental standards.

Signed,

Jacek Rzepka
