D02 P950

### **Energy Management Policy**

#### Introduction

At [Your Company Name], we recognize the critical importance of energy management in contributing to a sustainable future. This Energy Management Policy outlines our commitment to responsible energy use, aligning with best practices in Ireland and global environmental standards.

#### Policy Statement

We are dedicated to improving our energy efficiency and reducing our environmental impact by adopting and promoting sustainable energy practices across all aspects of our operations.

#### Key Principles

**Energy Efficiency:** We commit to optimizing energy efficiency in our facilities, processes, and projects. This includes regular energy audits, upgrading to energy-efficient equipment, and employing smart technologies to monitor and reduce energy consumption.

**Renewable Energy Sources:** Whenever feasible, we will prioritize the use of renewable energy sources over conventional fuels, aligning with Ireland's national goals for renewable energy.

**Energy Monitoring and Optimization:** Continuous monitoring of our energy consumption will be conducted to identify areas for improvement. This includes setting energy performance targets and tracking progress towards these goals.

**Employee Engagement and Training:** We will foster an energy-conscious culture within our organization by educating and engaging our employees on energy-efficient practices, encouraging their active participation in energy-saving initiatives.

Compliance with Regulations: Our operations will comply with all relevant Irish and EU energy regulations and standards, ensuring that we contribute to national energy efficiency goals.

Sustainable Procurement: In our procurement policies, we will prioritize vendors and products that adhere to energy-efficient and environmentally friendly practices.

#### Continuous Improvement

We are committed to the continuous improvement of our energy performance, regularly reviewing and updating our energy management practices in line with the latest technological advancements and best practices.

#### Community and Stakeholder Engagement

We aim to lead by example and will engage with our community and stakeholders to promote energy conservation and sustainable practices.

#### Policy Review

This policy will be reviewed annually to ensure it remains effective and aligned with the latest energy management standards and best practices, as well as Ireland's national energy policies.

Signed,

Jacek Rzepka
